

ACVM Registration Standard And Guideline For Efficacy Of Corticosteroids

Prepared for the Ministry of Health

Description of health events

Medical severity among those who receive Practical Support Plans, based on proportional extrapolation from the PAM Health Service. These figures do not represent the number of people who have had a reaction, rather the severity of the identified risk condition.

Severity	Description	% of PAM HS PSPs	Rate per 1000 population	Hamilton Projection
Highest severity	Eg anaphylaxis to relevant foods, multiple severe food allergies in child, very severe asthma	7%	0.27	8 (3-14)
Significant medical	Eg definite or unstable asthma, eczema or upper respiratory with significant severity	29%	1.1	33 (22-44)
Other medical	Eg short-term irritant symptoms or mild respiratory, mild skin problems, headaches,	29%	1.1	33 (22-44)
Precautionary because of previous medical diagnosis	Eg lower respiratory: alveolitis, emphysema, bronchiectasis; lichen planus, immune disorders, rheumatoid arthritis, SLE, past/current history of Chronic Fatigue Syndrome, and major medical problems not known to be at specific risk of aggravation by spray exposure	19%	0.74	22 (13-31)
Mainly psychosocial justification	Eg pregnancy or situational stress as justification, general concerns about spraying	16%	0.62	19 (10-27)
